GUIDE

render-doc Self-Test Guide

Proves HTML and PDF render from a synthetic doc-model.

Will Vessels · 2026-06-27

For: the render-core builder

Learning objectives

- Confirm prose, callout, list, and screenshot blocks render.
- Confirm the **crop** box is applied to a screenshot.

Overview

This is a *synthetic* guide. It uses **inline markdown**, a `code span`, and a link.

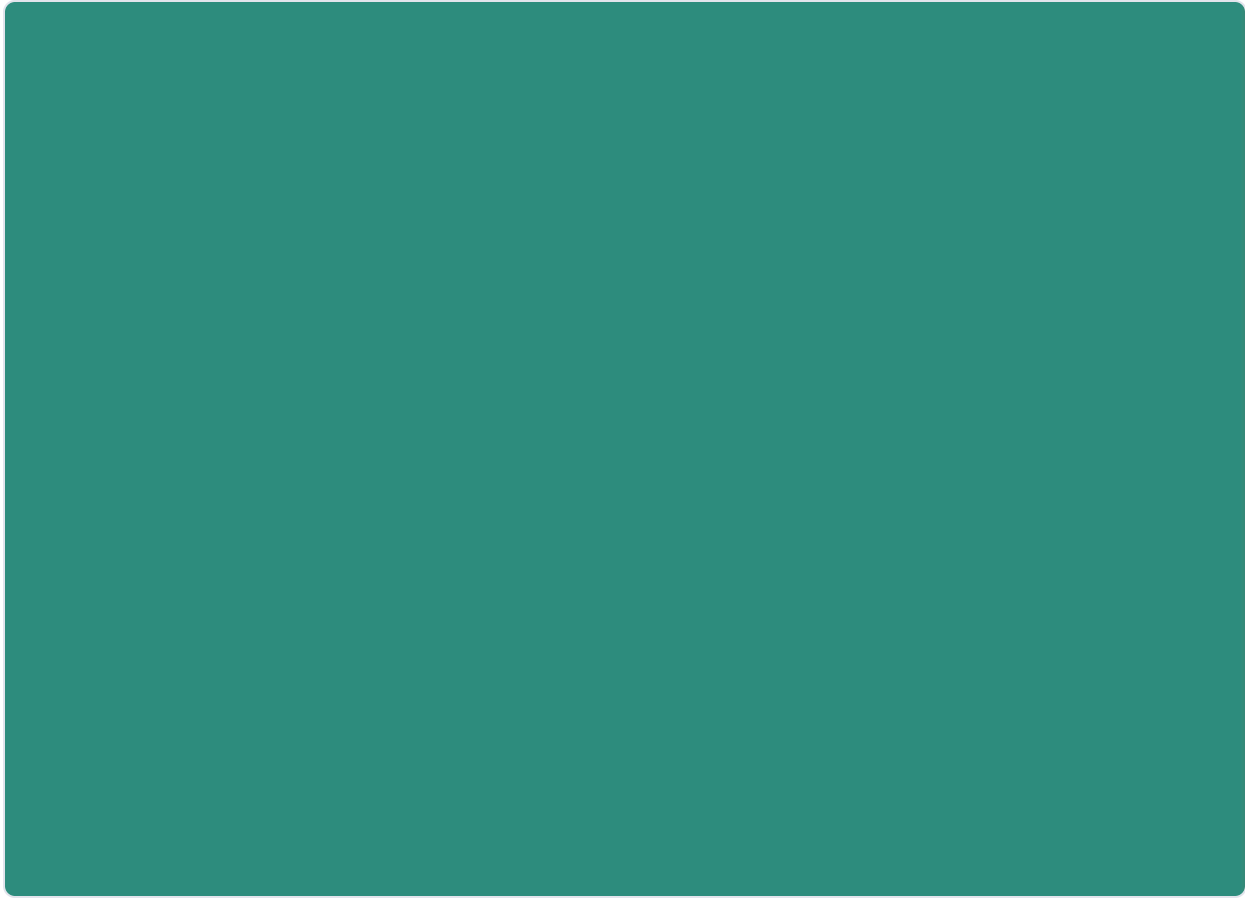

TIP

Callouts render with a colored rail and a label.

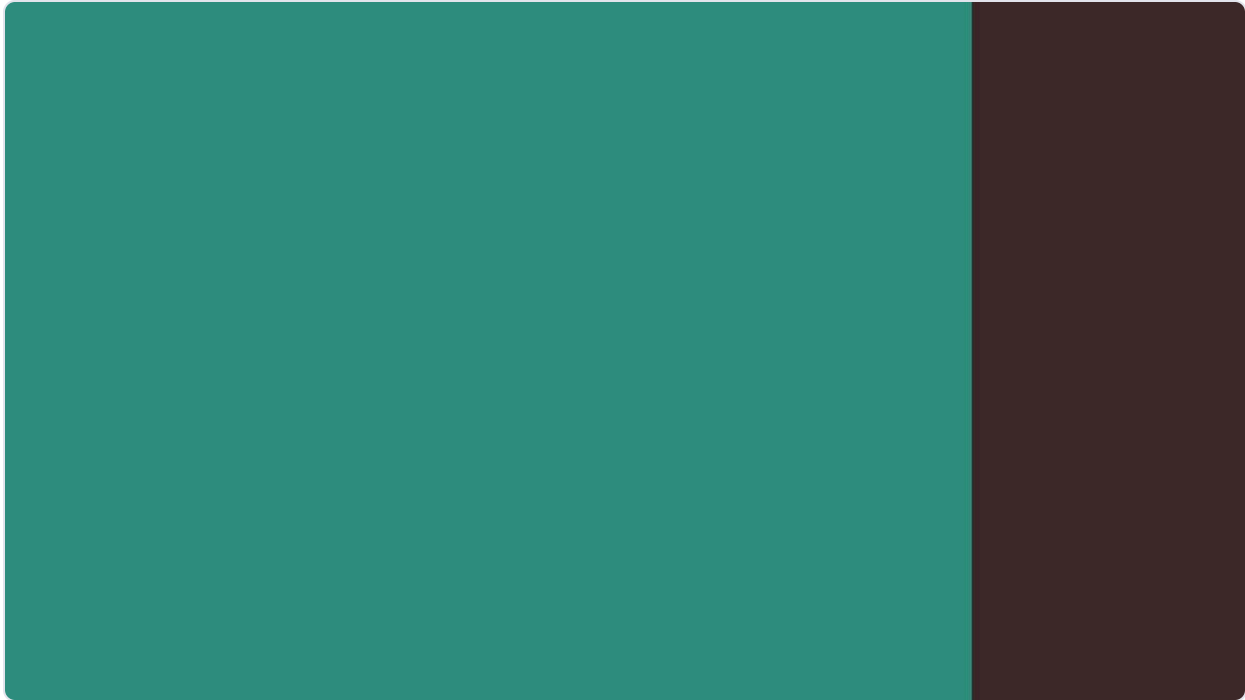

1. First step.
2. Second step with **bold**.
3. Third.

Screenshots and cropping

The frame below is cropped to drop the webcam strip on the right (kept box = left 78%).

Cropped: webcam strip removed.

Full frame (no crop).

[screenshot frame 999 unavailable]

This frame is missing on purpose.

WARNING

The missing frame above must render a placeholder, not crash.

Summary

If you can read this, sections rendered in order.

Unknown block type degrades to prose.
